#### McKINLEY'S MURDERER CHEERED BY ANARCHISTS

#### The Leader of the Chicago "Reds" Praises Czolgosz for His Act.

Chicago.-President McKinley's assassin was cheered publicly in Chicago. A Edward F. McSweeny, Deputy Commischallenge from the platform that anarchists dared not condone the crime at New York, made a strong argument for Buffalo was met with a vigorous, "You're the exclusion of the Japanese, whom, he a liar" Abraham Isaak, the recognized declared to be more undesirable than the leader of the "Reds" in this city, and Chinese. editor of Free Society, declared openly that he could not condemn the assassin's act. He said that as to personal merit

he took a second place to Czolgosz. The confession of Isaak was accom panied by a scene of intense excitement. It was the climax of the debate on "Socialism or Anarchy," and came when the audience of over 1,000 had been aroused thoroughly by wild oratorical

denunciations. "Hurrah for Czolgosz" shouted a man in the gallery, swinging his hat above his head. Hisses, jeers, yells of approval and cat calls came from all parts of the house. The crowd rose to its feet and a riot was only averted by the prompt action of the chairman.

Distance doesn't lend enchantment to one's view of the almighty dollar.

The stork should have been given a hint that Papa Zimmerman's purse strings could be loosened only by a boy.

Eighty-two per cent of the housekeepers of the country get along without hired girls. The eighteen per

Love, like lightning, seldom strikes twice in the same place. That's why widows usually marry for money the second time.

Countries having the American engine only need a supply of American coal to make them happy, and the coal is rapidly reaching them.

Girls, if you haven't found the right one yet, don't be disheartened. A Chicago woman was recently married the third time to the same man.

It was the irony of fate. A couple

of burglars broke into a building at Rochester, N. Y., which they supposed was a warehouse. It proved to be a jail.

Bad grammar may be cured by medical treatment, acording to a German specialist. This discovery will be a boon to some of our statesmen and would-be

The Supreme Court of Michigan has decided that bicyclists have a right to ride on the sidewalks. There seems to be nothing left to pedestrians but the right to trust in Providence.

Sarah Grand, author of "Heavenly Twins," says American gentlemen are the most chivalrous in the world. Al, there, Sarah, just tell your manager to forward a list of your lecture dates.

Hardly has the twentieth century got well started before a speaker at a women's club says the nineteenth century, of which those who lived in it were so proud, was crude and uncivilized.

What a woman can't understand is how a man will stay up every night for six weeks running all over town trying to make votes for a candidate he doesn't know, but getting hopping mad if he has to run across the street to get some paregoric for his own baby.

"Don't watch the clock," was Mr. Edison's advice-to a young man who recently asked him how to succeed. foundly significant is that old joke the laborer who left his pickax hanging in the air at the stroke of noon. 'A hanging pickax is the fittest emblem for a confirmed clock-watcher-and the pickax hangs always in the air, never digs out a path for him to advance upon.

Juliet's "What's in a name?" might be asked regarding the vessels of the British navy which have borne the names of reptiles. It is said that four Vipers have been wrecked, the last of the name but recently, and a Cobra still more lately has broken in two and gone to the bottom with officers and men. Also four Serpents, three Lizards, two Snakes, one Alligator, one Crocodile, one Rattlesnake, one Basilisk, and two Dragons-which are not reptiles, have at various times met with disaster. British tars, it is said, have a superstitious, feeling of dislike against sailing in vessels bearing such names. Lucky or unlucky, the names are needlessly disagreeable.

The decision of the Michigan Supreme Court that bicyclists have a right to ride their wheels on the sidewalks under proper restrictions is likely to cause a great deal of trouble in Michigan cities and in those of any other State which adopts the principle of the decision. If bicycle riding were permitted on the crowded streets in the business sections of a city it would amount to an intolerable evil. Their total exclusion from sidewalks of this character is based upon the principle that the sidewalks, as their name implies, were set apart for pedestrians, and that vehicles of any kind which would interfere with the free and safe use of such sidewalks have no right to be or to be operated there, except as such right or privilege may be granted by the City Council. City Councils have, we believe, been usually disposed to extend this privilege to sidewalks through sparsely settled districts where there were no bicycle paths and either no pavement or a very bad one. All the just claims of young man; but my opinion is you the bicyclist to the use of the sidewalk | won't!" when the conditions exclude him from the street can be far better met, with a due regard for the convenience and safety of the pedestrian public, by starting with the principle that he has no original right there and must get his privilege from the Council, than by assuming that he has an oroginal right to go there and that the Council can only restrict the manner of its exercise. We do not believe the Michigan decision will be followed by the courts of other States, or that wheelmen generally will regard it with favor. As a rule they have no use for sidewalks where they are liable to come into collision with pedestrians unless driven to them by the bad condition of the street.

Life imprisonment is at its best a punishment so horrible that only a ense of its absolute necessity can reconcile one to the infliction of it upon a ling, yet they fail to touch.

was the same of the same of the same

THE ENTERPRISE a fellow human being. To spend year after year in close confinement living only in order to wait for death, is a thought from which the mind recoils, and the strength of the instinct of selfpreservation is nowhere more clearly displayed than in the fact that men are willing to face this project rather than shorten their tortures by submitting to the noose or the electric chair. If, then, life imprisonment is in any case terrible to contemplate, how much is its terror heightened when the person who is condefined to undergo it is so young as to make it seem probable that four-fifths of his life will be spent within the prison walls! Smith Jones, of Warwick County, Indiana, entered upon such a term of detention a few weeks ago. He is at present 13 years old, and has been guilty of so cold-blooded a murder that the Judge who tried his case, concluding that he would derive no benefit from the reform school, sent him directly to State prison, there to remain for the rest of his natural life. If the boy is an ordinary boy, betrayed into an act of murder by sudden impulse, the sentence passed upon him is certainly unjustifiable. A certain number of years in the reform school would probably send him back to the world a steady and responsible citizen. But it seems likely that the boy had shown tendencies that made his reformation impossible. He was probably what the sociologists call a "degenerate" and what medical men call a "pervert," with a physical and moral nature so hopelessly diseased that the only possible course of action was to separate him from his fellows and to put him in a place where his depraved instincts, altogether ungovern. I rofessor Haeckel Gives Out a New able under other conditions, might be confined and repressed. It is a life lost, but the loss seems inevitable. The most careful investigation should be made, the world's greatest living advocate of however, and the boy's case should not be abandoned until it is altogether hope-

The other day a young man, son of a New Yorker, who left a million-dollar estate, was in court, insisting that he could not pay a judgment of \$556, or, in fact, any of his debts. He declared that he had been reared in idleness, in an atmosphere of wealth. When his father died he left the son \$6,000 a year, and no more. He also left him as helpless as a baby, with a mind unstocked with a single thought that would sell for money in the business world. Mus- of the theory, advanced for the first cle!" This young fellow had it, but he time only a few months ago by Vircouldn't compete with the poorest man cllow, that monkeys are descended from in a sewer trench. The \$6,000 was nothman, and not man from monkeys. That, ing for a man who belonged to several in fact, monkeys are nothing less than clubs and associated with people who degenerated humans. could buy him and sell him and never feel it. Viewed from a moral standpoint, he is a good deal of a coward. The man who buys things knowing that he can not pay for them is a swindler. You can not call him anything else. If he has anything more than water in his veins he will work. He will dump the clubs and high-living associates and get down to business. He will learn, and find no disgrace in toil. But what of a man who allows his son to grow up in idleness? It is an at in the "Origin of Species" and fully After several years of faithful work he strength.—Ledger Monthly. imposition. It is not fair. It is inviting disaster. How easily fortunes take flight in this country! There is history for it. The millionaire of today may be the poor man to-morrow. The moving van backs up in front of his stone palace and he goes to live in a tenement. There is nothing certain about riches-not even their paramount desirability. It is often easier to make money than to keep it. The youth who grows to manhood without any greater, idea of the practical side of life than how to order a wine supper or guide an automobile may have to wear his tennis suit in lieu of underwear in chill December, and the world doesn't offer him much sympathy when trouble comes. Every man should teach his boys to do something. His bank account isn't a part of the issue. The real independence is called trained ability, and it is capital that is always missing link. available. Every man should have some of it, for when he does need it

#### he needs it badly.

Ambushed, Poor Fellow! "When does the next train that stops at Montrose leave here?" asked the resolute widow at the booking office window.

"You'll have to wait five hours, ma'am."

"I don't think so."

"Well, perhaps you know better than I do."

"Yes, sir! And perhaps you know better than I do whether I am expecting to travel by that train myself, or whether I am inquiring for a relative that's visiting at my house! And maybe you think it's your business to stand behind there and try to instruct people about things they know as well as you do, if not better! And prehaps you'll learn some day to give people civil answers

"Yes, ma'am!" gasped the booking lerk.-London Answers.

betrayed in her earliest efforts at adornment of her person and surroundings. It is the temperament of woman, chest with a big sponge. Rub briskly as well as her natural birthright, to guard the beautiful in life, and to make her whole existence a visible manifestation of it. Civilization has given to her opportunities in this direction denied her in the past. She has been emancipated from the slavery of conditions which narrowed and destroyed these possibilities of personal expression born within her. Yet even in barbaric times she was not blind to the influence of personal adornment. The evolution of her dress may have been from the rude blanket and wild boar's skin to the modern silks and furs of unrivaled beauty and picturesqueness; but there were always, even in the beginning, a method of wearing the garments that betrayed the dormant gifts. She could be artitstic even with the simplest and rudest of garments.

The art of dress becomes a factor of importance, not only in the life of the woman who devotes her time to it, but distinguished German naturalist, and biological science has taken place. for the duties she will fill in her new post of assistant pastor. These will be largely concerned with the children's work of the visitations to the homes of the members and with the Sunday school and young people's societies.

The Smile Cure for the Blue. The smile cure for blues is the latest remedy and it is the suggestion of a physician who has made a specialty of nervous diseases. His experiments are said to have resulted satisfactorily in numerous cases. "If you keep the corners of the mouth turned up you can't feel blue," is his dictum, and his directions are "Smile, keep on smiling, don't stop smiling." When his patient is suffering from melancholia without any bodily ill he gives no medicine, but just recommends the smile cure. He first experimented on his wife, who was of science and to and style; views herself apart from her a nervous and rather morbid temperament, and he used to jokingly say, "Smile a little,' until the saying came the institution love which is little lower than that to be a household joke. The result was with which he has which the poet or painter feels for his so good, however, that the doctor determined to try its effects on his other so worthily con- ble task for woman of adorning her patients. Keep in a glass jar, and use three tablespoonfuls each time, or ing and exhaling deeply and slowly. more if necessary. When the hair gets Drop the head forward, then back as stringy sponge with diluted alcohol.

Storing Farm Tools.

It would seem as if it were unnecessary to urge farmers to take care of their tools, yet during a recent trip of agreement among fruit growers. One less than 150 miles a writer in the In- thing we have found out, however— And spaces whence the wind has shed dianapolis News says he counted no when it is necessary to remove a limb About my feet the living red, less than twenty tools of various kinds of considerable size, an inch or over in Are filled with broken blue. exposed to the rain and sun. These diameter, the best time is September were seen from the windows of a and October. Wounds made at that And crowding close along the way swiftly moving train, so that it is safe to say that, including the farms a mile distant from the railroad, there were more than two hundred tools out of doors that ought to have been under cover. After such a sight it was a relief to reach a farm where the tools were well cared for. On the farm in question was a long, narrow building devoted entirely to a storage place for tools and a repair shop. After each tool was used it was put under the shed, and during the winter all of the woodwork was thoroughly painted and all of the metal that had rusted was sandpapered. There was a small anvil in the part of the structure devoted to repairs, a bench with both iron and wood vises, drawers divided into compartments for bolts, screws, nails and nuts of various sizes and a very fair set of carpenter's tools. The owner claimed that this repair shop had saved its cost every year in blacksmith's bills, and that by caring for his tools he was not only able to do better work with them. but they were in shape for good use for many years longer than they had been neglected.

False Economies in Farming. For some reason nearly every farmer considers that he must economize in the matter of seeds. If he does not make the mistake of buying cheap seeds, that is, seeds low in price but poor in quality, he tries to save on the quantity with the result that he leses in the crop. In the sowing of grass seeds, for example, in which clover has a part, how many farmers have blamed the clover seed or claimed that the soil was "clover sick," when the only trouble was he did not use enough seed. As a rule, the catalogues of seedsmen are safe guides to the quantity of seed necessary with grass seed. Then there is the fertilizer economy. and here economy is practiced both in quantity and in kind. That is, the farmer will find that a certain fertilizer, applied in moderate quantities, has improved the wheat yield and ever after fertilized by any of the perfect blossom he uses the same amount and the same sorts so numerous among the mid-seakind in growing wheat, forgetful of the son varieties. One feature of the plant fact that he is taking from the soil in is its deep-rooting qualities, which the crop other plant foods which he is must of necessity make it somewhat not returning. Result, a worn-out soil. independent of dry weather.-Indian-Look into the question of these and apolis News. other economies and see if they really are economies.

Para Door Protector. A simple device will keep out the cold and prevent ice and snow from freezing around the bottom of the barn door. A board long enough to reach across the door has end pieces fitted in to form a

DEVICE FOR THE BARN DOOR.

tiny water-shed, strips of hoop iron being used to secure the board to the door. The strip of board used should be of some light but tough material, which will not add much to the weight of the door. While this appliance is being put on another protection might be added, in the shape of a weather strip placed on the door in such a manner that it will cover the crack between the door and the casing when the door is closed.

Cleaning Buggy and Harnes. The method used by one farmer and one which makes it possible to perform the work without soiling one's garments to any disagreeable extent is: He first removes all cushions, curtains, etc., dusts well and cleanses leather or rubber parts. The next is to place the buggy on two trestles and remove the wheels to a watering trough, which is beneath a large willow tree. Spray the buggy. Then turn the wheels around in the trough. At the same time In a short time he will be halter broken enough not to scratch the varnish. The up at once. wet long or the paint will acquire a thoroughly dried.

rinse with clear water and set in the horse of confirmed bad temper.

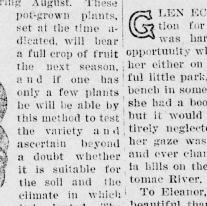

shade to drip off while the remainder of the rig is attended to. Wash in the same way. Wipe with a cloth wrung out of clean water and polish with a soft lintless rag. Well-worn ginghams are good for this purpose. Wipe all drops off the wheels with a clean, wellwrung cloth and follow with a dry one. Clean all gummy substance from the spindles and inside the hubs. Oil spin-

Fall Pruning.

As to whether fall or spring is the best time for pruning there is a disseason, though they may not heal over as quickly as at some other times, will never decay. Owing no doubt to the ripe condition of the wood, the cut surface dries and becomes as hard as bone. We have tested this for many years The autumn wood the aster knows, and know it to be so.

In all pruning particular care should be used to make smooth cuts. No stubs The squirrel chattering overhead, should be left sticking out. It is sur. The timid rabbit's lighter tread prising to observe in passing along the road how frequently this important rule is disregarded, and that, too, by persons who profess to understand the Along the purpling wayside steep business. Another important point is the removal of all dead and decaying And meadows drowned in happy sleep limbs. Another is to cut off one—the east desirable one, of course-of the branches of every fork in order to prevent the tree from splitting when loaded with frunit.-National Stockman.

#### FAMOUS SPINDLE TOP HEIGHTS IN THE BEAUMONT, TEXAS, OIL FIELDS.

Spindle Top Heights is the name given to the location of the first of the great gushing wells of petroleum that have made Beaumont, Texas, famous. The first well at 10:30 a. m., Jan. 10, 1901, suddenly shot out a great volume of water, sand, rocks, gas and oil, breaking the derrick and hurling fragments for hundreds of feet. It was nine days before the flow could be controlled. It soon changed to be a great jet of crude oil of purest quality, going to waste at the rate of 70,000 barrels daily. Since that time Beaumont, then a small Texas town, has become a city of 20,000 inhabitants and the number of gushers in its vicinity has increased to nearly 60, with more in prospect.

The 50 Beaumont gushers are capable of producing in ten days as much oil as the wells of West Virginia, California, Indiana and Ohio have in the last fifty years. The actual cost of producing this oil is one-fifth of a cent per barrel, while the ability of the producers to handle it cannot be crippled by hostile combinations of capital, because of the proximity of the field to the deep Mater ports of the Gulf of Mexico.

#### ASTERS.

Walled in with fire on either hand I walk the lonely wood-road thro';

The purple asters blossom free; In full profusion far and wide, They fill the path on every side, In loose confusion multiplied To endless harmony!

The empty nest, the wind that grieves The sunlight breaking thro' the shade, Among the rustling leaves.

And still beside the shadowy glen She holds the color of the skies; She hangs her fringes passing deep, Are lit by starry eyes! -Vick's Magazine.

#### "There's Many a Slip."

LEN ECHO possessed a fascination for Eleanor Wade which was hard to resist, and every a full crop of fruit opportunity which afforded itself found her eyes to wander restlessly from obthe next season, her either on her way to that beautiand if one has ful little park, or seated upon a rustic she saw, until, on the opposite side of only a few plants bench in some secluded nood. To one of the latter Eleanor always came, and if she found it already occupied, her disappointment was keen. That particular seat ("our beach," they had called, it), was sacred to the memory of many hours of happiness, and Poor feeding will make a weak colt to-day the young girl's thoughts dwelt lovingly upon them. She remembered | said: a thousand and one little incidents; trivial events, of no importance at the time, but now, delightful to look back upon. The future without Hal Burton loomed up before her blankly. Her eyes filled with tears, and there was a pain in her heart which she found it impossible to assuage.

It was in vain that she tried to be come interested in the beauty of the scene before her. Down at the foot of the steep banks, she-saw the boats passing up and down the sluggish canal. Then she looked beyond, over the pretty-little wooded island, where the roof of the Pleasure Club house could be seen between the trees, to the many rocks in the river, around which the waters of the Potomac eddied and whirled unceasingly, making a picture far too difficult for the brush of mortal

"Ah, yes, Hal could paint that water!" Eleanor declared mentally.

Among her most highly prized treasures was a sketch of the river and a glimpse of the Virginia hills, which Hal had been making on the day her party had accidentally come upon him in this very spot. It was here he had been introduced to her; here, some time later, he had asked her to be his wife. Here it was, she promised, and then had followed those many delightful months. To-day the thoughts of the unhappy girl continually drifted back where you were. I went abroad solely long?

qua grounds adjoining, where she and good in everything."

Alas! it was here they had quarreled; what it had all been about the girl | was coming down to this seat to wait could scarcely remember. Both were until the other was vacant. And just foolshily quick, both proud. To who think, sweetheart, it was you all the was at fault, Eleanor now gave no time!" thought; she would have taken the blame and asked forgiveness for her there I made up my mind to go to you, hasty words, fault or no fault, if he and explain away our little-misunhad but come to her; but he did derstanding-if ever I had the oppornot, and she could not seek him. Not tunity; but really I did not intend to long afterward she had gone abroad throw myself at your head in this with her parents, and when she re- fashion," she added, with a smile, turned to Washington, it was only to learn that Hal had left the city.

She caught her breath sharply and

pressed her hand against her heart as since you are not hurt," he continued, if to quiet its violent throbbing, when tenderly, "I bless the fortunate slip a sudden thought flashed into her mind. Perhaps he did not care; perhaps his was merely a fancy. No, no! man said earnestly: She felt that he had suffered, too, for he loved her; of that she was conhappy past and the dreary future with- be married in the little chapel in the out him, she vowed to herself that if Chautauqua Park-now-to-day. I she ever saw him again she would cannot run the risk of again losinsg speak to him and explain, even if he you." did not come to her. But where was he? Would she eyer see him againever have an opportunity to explain? Sitting thus dejectedly, she allowed ject to object, scarcely heeding what the narrow ravine, over which the ledge of rock projected, she noticed ta ers. They seemed almost within reach, and she decided to gather them as a souvenir of this visit to Glen

Echo. Perhaps it would be the last, for each succeeding visit only served to make her more lonely than before. Then, beside, "Autumn, laying here and there a fiery finger on the leaves." told only too plainly of approaching winter, when this loved spot would be robbed of many of its beauties. Stepping from the rock, Eleanor climbed up a 1ew feet and steadying herself by clutching the ferns and bushes at her side, reached out over

the narrow space toward the coveted blossoms. Closing her hand around them, she gave a quick jerk to pull them from the stem, but at that instant the moss covered stone upon which her weight rested moved slightly, and she felt herself slipping down the bank. She frantically clutched some bushes growing directly before her, but in her eagerness caught them too near the tops, and the branches slipped through her fingers, leaving only the leaves in her hand.

A second attempt caused her to lose her balance altogether, and she half slipped, half rolled, some distance down the bank, carrying with her, in the descent, a shower of dirt and small stones. An instant later she found herself sitting upon a ledge of rock jutwas a bench similar to the one upon which she had been seated.

leaned back against the bench, undecided whether to laugh or cry, and thinking how ridiculous she must ap "that if you should take hold of the pear, and thankful, indeed, that no one case you could collect the money." had witnessed her undignified fall. MILITARY AIDS TO SCIENCE.

British and German Officers Send Home Valuable Specimens.

Lieut. Boyd Alexander, rifle brigade, who is well known at South Kensington (London) museum for his studies of birds in Africa, has just returned from the west coast with what is believed to be the finest collection ever obtained on active service.

Over a thousand specimens of West African birds, killed by himself and his native collector during the campaign in Ashanti, were brought back by Lieut. Alexander.

"This is the biggest collection of birds ever brought out of Africa at one time," he said to a London Mail representative. "I have been collecting in Africa now for nine or ten years. One has to be a specialist nowadays.

"It is a pity that the government does not insist on officers in out-of-the-way parts of the world collecting birds and other things. The German efficers do so already. The colonial office at Berlin obliges all its officers to collect natural history specimens whether they like it or not, and though their work is in many cases rough and ready it is better than nothing.

"We know very little about the birds in the great bend of the Niger and Hausaland, and absolutely nothing of those in the regions around Lake Chad and Darfur. There is not a doubt that when these great areas come under investigation it will be found that one great zoographical region exists from northeastern Africa right across to the west coast. When I have finished examining my collection of birds they your coming to explain was rather may throw considerable light on the

"Marching with the relief force to Kumasi I left my native collector at Prahsu, where he formed the nucleus of the collection. As the country became more settled he gradually worked his way up to Kumasi, making collections at each station on the lines of

Bix Months, '

OFFICE-Postoffice Building, Cor. Grand and Linden Avenues SOUTH SAN FRANCISCO, CAL. BRANCH OFFICE, 202 Sansome St., San Francisco, Room 4, third floor.

SATURDAY, DECEMBER 14, 1901.

The Sunset Magazine for December, Christmas number, maintains the excellence of this valued publication. "The City of Mexico" and Luther There is a review of the recent Episcopal Triennial Convention and some choice poetry and a short story.

Germany would no doubt like to colonize a portion of Venezuela as consideration for damage claims of German citizens against the South American I've solved the riddle, read the face republic, but Germany will without doubt be prevented from doing anything of the kind. The young Kaiser is ambitious and daring, but he will ago. have to learn that the Monroe Doctrine is a fact and not a theory.

The reciprocity business does not loom up as big as the friends of free trade confidently expected. A general tariff act is the result of mature consideration, discussion and many concessions and compromises by and between the varied industries and interests of the entire country. To disturb such a settlement of such a question by anything in the form of a reciprocity treaty seems bad public policy.

The annual meeting of the California Water and Forest Association will be held in the Maple room of the Palace Hotel, San Francisco, December 20th, commencing at 10 o'clock a. m. The association will invite President Roosevelt to visit this state and will formulate the association's views upon the policy of leasing the public lands in arid and semi-arid districts for cattle ranges; and upon a true forestry policy, state and national. The meeting also in the less stately yet more pleasis an important one.

A Garden of Milk.

The Milk garden of Frankfort, reserved for the children of that aristocratic city, is in itself one of the most democratic of places. Here rich people who wish to be relieved for a time of the presence of their children send them, accompanied by their nurses. Here also poor people who can n afford to devote their own time to their children nor hire separate nurses for them may bring their little ones, certain that from the garden nurses they will receive all the care and attention necessary to safety, health and amuse-

Private nurses of the rich people and public nurses of the working people are subject to a supervision sufficient to protect the children of all classes from cruelty and neglect. The only food furnished in the garden is milk, whose freshness and purity are assured, inasmuch as it is drunk warm from the mild eyed cows which occupy stalls on one edge of the field.

A Savage Bluejay.

A sportsman camping on one of the lakes of Sullivan county, N. Y., offered to bet \$10 to \$1 that nobody in his party could guess how he had received an injury to a finger which he held bleeding before the spectators. No one guessed, and the man went on to explain that while standing by the lake he had seen a bluejay flying over so close above his head that he instinctively threw up his hand to stop it. The bird neither stopped nor swerved, but instead dashed straight for the hand, striking it with such force that the bill penetrated to the bone and sent the blood spurting as though the man had been struck by a knife.

This sort of action is in line with the general conduct of the jay. It is one of the most aggressive birds on the continent, robbing the nests of other birds and sometimes even killing young squirrels. The chief good thing that can be said of it is that it often robs the nest of the English sparrow.

The Maori and the Witness.

Captain Hayes in his book, "Among Horses In South Africa," tells several amusing stories. A friend of his in New Zealand bad been a government interpreter among the Maoris and had many stories to tell about these people. On one occasion a native chief, who was under cross examination in court, on being asked why he had not brought a tertain man with him replied:

"I have brought him." "But," said the barrister, looking in vain round the court, "I don't see him. Where is he?"

"He is here," chuckled the Maori proudly, stroking his massive chest.

WANTED—SEVERAL PERSONS OF CHARacter and good reputation in each state (one in this county required) to represent and advertise old established wealthy business house of solid financial standing. Salary \$18.00 weekly with expenses additional, all payable in cash each Wednesday direct from head offices. Horse and carriage furnished, when necessary. References. Enclose self-addressed stamped envelope. Manager, 316 Caxton Building, Chicago. 3-14-02

#### WHEN THREE IS COMPANY.

The Satisfaction In Traveling Alone.

"Oh, the pleasure of eating alone!" wrote Charles Lamb in one of his most expansive letters. We are not quite sure. how serious he was in the exclamation. But change "eating" into "traveling," and there may be found thousands who will echo the cry. Thackeray thought there was nothing to equal it. Louis Stevenson, in the Cevennes, made the same discovery, for his donkey cannot be said to count.

Jean Paul Richter, though he did not e la touring times, was too accomshed an individualist (of the sentiental kind) not to harp on this musicstring. "I hold the constant regard hat we pay in all our actions to the judgment of others as the poison of our peace, our reason and our virtue." Translated into plainer speech, Richter's words may read thus, "Unless you can have your own way life is but a poisoned puddle."

Curzon, Stanley, De Windt, Miss Kingsley, Landor and a host of smaller men and women have acted on the same assumption. And as in larger travel, better known as exploration, so urable "trips" of common life. After a full purse there is nothing so good for the vagrant as a free hand .- C. Edwardes in Speaker.

Length of Dreams.

Three physicians were discussing the matter of the length of dreams a day or two ago, when one of them related a

strange experience. "Yesterday afternoon," he said, "I called to see a patient, and, much to my satisfaction, I found him sleeping soundly. I sat by his bed, felt of his pulse without disturbing him and walted for him to awaken. After a few minutes a junk dealer's cart with discordant ringing bells turned into the street, and as their first tones reached us my patient opened his eyes.

"'Doctor,' he said, 'I'm glad to see you and awfully glad that you woke me, for I have been tortured by a most distressing dream that must have lasted for several hours. I dreamed that I was sick, as I am, and that my boy came into the room with a string of most horribly sounding sleighbells and rang them in my ears, while I hadn't power to move or speak to him. I suffered tortures for what appeared to be an interminable time. I'm so glad you

"The ringing of those bells for one second had caused all of that dream and just at the waking moment."-New York Herald.

The Terrapin Disease.

The terrapin is thought to have much influence in causing sickness, and the terrapin disease is either a rheumatic affliction about the chest and ribs or possibly some pulmonary trouble. The association of the terrapin with diseases in this portion of the body doubtless originates from the fact that the ribs of the terrapin are not free, as in the case of most of the higher animals, but are united into one piece.

An Indian who was ill applied for relief to a shaman and was asked, "Did you not when a boy tie strings to the terrapin's tail and worry the creature?" The patient admitted that he did.

"Well," said the medicine man, "that is what is the matter. It is the terrapin's turn now, and the terrapin is paying off old scores. You have the terrapin sickness, and all your ribs have grown together and to your breast-

The shaman administered the proper remedy prescribed in such cases-I forget what it was-and the man thought he was cured.

The following anecdote of Leigh Hunt was once related by "Orion" Horne. Horne on a bitterly cold day in winter went to see Hunt, and found him in a large room with a wide, old fashioned fireplace. He had dragged his piano on to the hearth, close to a large fire, leaving only room for himself and his chair, and was playing with the greatest enjoyment.

"My dear fellow," cried Horne, "are you aware that you are rulning your piano forever and ever in that heat?"

"I know-I know," murmured Hunt, but it is delicious."

#### WEAR OF THE EARTH

HOW THE FACE OF OUR GLOBE IS CONTINUALLY CHANGING.

Geological Agents That Are Always Busy in Nature's Great Workshop. Where Man Has Comparatively Little Influence.

The atmosphere plays its part in geological operations. Its corroding power, backed by rain and wind, helps to decay and disintegrate those rocks which are exposed to its influence. Rain completes the work thus begun. Wind blows dust, sand and volcanic ashes over large tracts of earth-in fact, over the whole of it.

It is only of late years that geologists have discovered that fine volcanic dust is carried over the whole of When we were introduced, he was sit-the earth's surface and plays a very ting at his table writing. He gave his important part in the deep sea deposits. On deserts and nearly rainless regions blown sand will wear away the hardest rocks by beating against them. Some sandstone formations appear to have been piled up by winds.

Winds cause ocean currents, waves and storms. The great denuding him, he would slap his leg and laugh. power of the sea is largely due to the atmosphere. Some parts of the English coasts are being rapidly washed away. Plants and animals have their distribution considerably affected by winds and ocean currents. Again, whether living in water or on land, animals live on the oxygen supplied from the atmosphere, and land plants absorb carbonic acid from the same

Rain acts in two ways: (1) chemically by dissolving certain substances, such as lime, out of the rocks, and (2) mechanically by wearing down their surfaces as it flows over them. Any old building-a ruined castle or catheered" surface resulting from the action of rain and wind. In sandstone structures the details of carving are often lost, and on old tombstones the lettering can hardly be deciphered. Springs are due to rainwater collecting n rocks and rising to the surface. Rivers are fed by rains and springs.

A river is a very powerful geological agent. In the hardest rocks rivers gradually carve out a valley or gorge This is accomplished partly by chemically dissolving certain mineral substances, but chiefly by mechanical erosion, the stones, sand and mud wearing away the bed of a stream as they run and tumble over it.

The finest examples of river action are the famous canyons of Colorado which in some places are gorges 5,000 or even 6,000 het deep, with vertical sides. But, as already pointed out, rivers have a constructive action quite as important as their destructive action. By bringing down their burden of sediment into lakes, estuaries and seas they build up great piles of rock and "sow the dust of continents to

Glaciers are rivers of ice fed by the 'eternal snows' of high mountain ranges such as the Alps. They wear out their own valleys as rivers do; they transport mud, sand and stones to great distances, in some cases sending them sealed up in icebergs to float far out to sea and on melting deposit their of Newfoundland northern icebergs are depositing a great mass of "gla-

cial drift." The sea is a great denuding agent; but its work is more constructive than destructive. It is the workshop where nearly all the stratified rocks have or strata. The rivers and ocean currents continually bring in fresh supplies of debris even for hundreds of

miles. Man, compared with the lower animals, produces but little effect as a geological agent. Still the human race has considerably modified the distribution of plants by cutting down forests and by cultivating certain plants to supply food. So with animals. Certain useful species have been cultivated and enormously increased at the expense of others which prove useless or harmful.

But plants and animals have had, and still have, far more influence geologically. Coal seams are made up of vegetable remains of former periods. Forests have an important influence on climate and on animal as well as fix firmly in your mind the distinguishplant life. In the comparatively unknown world of the ocean marine plants doubtless have important func-

Marine animals accomplish a vast amount of geological constructive work. Great deposits thousands of feet thick owe their existence to small Coral reefs afford the most familiar illustration.

The force known as heat is of great the surface and probably has a very high temperature toward its center. In some places not very far below its surface it contains highly heated rock, which occasionally flows over the surface during volcanic eruptions. In other places we find hot springs in connection with volcanic action.

Heat exercises a powerful influence on rocks deeply buried below the earth's surface, chiefly by means of heated water and steam. In this way rocks have been very much altered or "metamorphosed." The crystalline schists have thus been brought to their present state by a series of chemical changes due to heat, and there is no doubt that they were once ordinary deposits of clay, sand, etc.-Hutchinson's "Autobiography of the Earth:" the Appleton Company.

Slow Payer.

Magistrate (to the Chinaman)-What's your complaint against this young man. John?

by.-Baltimore Jewish Comment.

#### A BUDDING HUMORIST.

Merry Memories of a First Meeting With Artemus Ward.

On going into the Cleveland Plain Dealer editorial rooms one morning I saw a new man, who was introduced to me as Mr. Browne.

He was young, cheerful in manner, tall and slender, not quite up to date in style of dress, yet by no means shabby. His bair was flaxen and very straight; his nose, the prominent feature of his face, was Romanesquequite violently so-and with a leaning to the left. His eyes were blue gray, with a twinkle in them; his mouth seemed so given to a merry laugh, so much in motion, that it was difficult I heard or read about the possibilities to describe.

It seemed as though bubbling in him was a lot of happiness which he made no effort to conceal or hold back. When we were introduced, he was sitleg a smart slap, arose, shook hands with me and said he was glad to meet me. I believed him, for he looked glad all the time. You could not look at him but he would laugh. He laughed as he sat at his table writing. When he had written a thing which pleased

I noticed that George Hoyt and James Brokenshire at their tables were pleased with his merriment and indulged in broad smiles. As I bade him and the others good morning he said, "Come again, me liege." I thanked him, said I would and went my way, thinking what a funny fellow he was.

Within a month thereafter appeared in the columns of The Plain Dealer a funny letter signed "Artemus Ward." The writer said he was in the show business, bad a trained kangaroo, "a most amoosin' little cuss," some "snaix" and a collection of wax figures, which he called a "great moral show." As he was coming to Clevedral, for instance-shows a "weath- land to exhibit, he made a proposition to the proprietor that they "scratch each other's backs"-the publisher to write up the show vigorously and the showman to have the handbills print ed at his office and give him free tickets for all his family. So I found my young friend of the gurgle and hay colored hair to be an embryo humorist just bursting into bloom. Artemus, as from that time be was best known soon had a city full of friends, myself and family among them .- James F. Ryder in Century Magazine.

## FLOWER AND TREE.

Never buy a plant in bloom. Never water plants in flower from shove.

In planting out an orchard do not plant more than can be manured and cared for well.

A yard or lawn always looks barren without some choice ornamental trees and shrubs. On this account every lawn should contain a few choice specimens of these ornamental trees.

Scale insects on plants, such as the oleanders, the fragrant clive, roses, etc., are among the most difficult pests to overcome. A mixture of white bellebore powder with dissolved soap rubbed in is a good remedy.

Keeping all young trees carefully staked leads to the formation of clean, straight stems. These in their turn are burdens on the sea floor. Off the coast conducive to the growth of large, up of the net with its invariable load terminating her reign in the short space healthy, fruitfel heads. One stout of whitefish, can do nothing but ac of a week and a half. A noted Engstake should be placed by each tree knowledge to himself the necromancy lish historian says, "Thus we come to when it is planted.

Crocus must be planted in October to insure spring blooms. It makes a fine appearance if thickly planted upon a lawn. Make a cut with a spade been accumulated and ranged in layers three or four inches deep in the sod, tuck in a couple of bulbs and press the sod back into place with the foot.

Perfectly Plain.

Uncle Rastus, who was seeking information concerning mushrooms, had been referred by a preternaturally solemn student to the professor of botany, and, with hat in hand, he was addressing that dignitary.

"Would yo' mind tellin' me, Mistah Mandrake," he said, "how to 'stinguish a musharoon f'm a toadstool?"

"Willingly," replied the professor. "In the first place, you must remember that the Amanita phalloides, or deadly agaric, closely resembles the Agaricus campestris, or edible fungus, which is our common variety and absolutely innocuous. Next, it will be necessary to ing marks or characteristics of the Agaricus campestris, which are these: A pileus not covered with excrescencelike scales; gills of a brownish purple when mature; stalk solid and approximately cylindrical; ring near the middle of stalk; base not bulbous and not sheathed by membrane. The distincalcareous creatures living in the sea. guishing characteristics of the Amanita phalloides, or deadly agaric, are these: Pileus destitute of distinct excrescences; white gills, hollow stalk; large importance. The earth is hotter below ring and prominent bulb at base, with membranous upper margin. Bearing these points of differentiation fully in mind you will never be at a loss to determine which variety you encounter in any given case."

"Yes, suh." said Uncle Rastus, turnng his hat round and round in his ingers. "I un'stan' dat all right, but how's I gwine to tell 'em apaht?'hicago Tribune.

#### A FISHING FICTION.

THE "MAGIC EYE" OF THE SAULT STE. MARIE INDIANS.

An Old Guide's Explanation of the Indian Whitefish Hunter's Method of Getting His Glistening Catch From Under the Rapids.

"The first time I fished in the Sault Ste. Marie rapids," said a well known Lake Keuka sportsman, "I landed in an hour twenty-one brook trout that weighed forty-five pounds; so I was ready and willing to believe anything of those waters or the astounding things that men who fished in them

were able to do. "Consequently I believed what they told me about the marvelous feats the Indian fishermen of the Sault Ste. Marie could perform in the way of netting whitefish. Few who have toured the great lakes have not heard of those same feats, witnessed them and, of course, could do nothing but go away believing that they were all they seemed to be.

"Particularly will they marvel, as I did, at the Indian whitefish fisherman's magic eye with which he seems to them up filled with fish. look down through ten feet or more of foaming, rushing water and see whitefish that to the white man's eye would be invisible five inches beneath the surface. It would have been strange if I had not marveled at it, having The wonder of it spread, and it has witnessed more than once manifesta- been one of the fondest and best paytions of its alleged power. That was ing fictions of 'Susan Mary,' as the na-

whitefish netters of the Sault Ste. Marie that the guidebooks and the hotel keepers and steamboatmen insist

twist, draws it up and, surrendering smoking." the care of the canoe for the moment to the Indian with the paddle, he draws the net up, never without from pounds each.

marveled at it greatly to Guide Garron, wonder.'

the shrewd and cunning old Frenchman who knows every rock and eddy and whirlpool of the rapids and all the wiles and tricks that any other guide knows and a whole lot that no other one does know, and Garron's little black eyes twinkled.

"'Ah!' he chuckled. 'Zat mageeck

hye. He von gr-r-rand homboag!' Then he explained in his voluble and picturesque patois the apparent mystery of the Indian whitefish fisherman's magic eye. Whitefish are natural denizens of the still, silent waters of the great lakes. To get from Lake Huron to Lake Superior these fish must fight their way up the fierce and stubborn Sault Ste. Marie rapids. In doing this they travel by easy stages. They can brave the rapids but a short distance at a time, when, almost exhausted, they drop into the shelter of the friendly rocks that pile the bottom of the rapids.

"Huddled sometimes by the score behind these rocks, getting wind, as it were, to overcome another stage of their journey, the whitefish, if the water is not too deep, can be lifted out by the hand of the fisherman, they are so nearly exhausted. The Indians as well as the white fishermen know this and, knowing well the location of these sheltering rocks, have only to thrust their nets down behind them and draw

"The cunning of the Indian led him long ago to give visitors the impression that he could penetrate the troubled depths of the rapids with his gaze and discover the whitefish on the bottom. before I talked with old Guide Garron. tives give you the pronunciation of the The astounding feats of the Indian Sault Ste. Marie."-New York Times.

When Children Smoked.

Jorevin de Rochefort, who published on telling tourists about are performed in Paris in 1671 an account of his travby two Indians in a canoe. One occu- els in England, tells the following: pies the stern and manipulates the "While we were walking about the paddle to keep the canoe's head point town (Worcester) he asked me if it was ed up stream. The Indian in the bow, the custom in France as in England standing upright, uses a pole to aid in that when the children went to school propelling the canoe or in keeping it they carried in their satchel with their books a pipe of tobacco, which their "Lying ready to his hand is a dip net mothers took care to fill early in the four feet in diameter, fastened to the morning, it serving them instead of end of a pole perhaps fifteen feet long. breakfast, and that at the accustomed The fishing is done at the foot of the hour every one laid aside his book to rapids, where the water boils and tum- light his pipe, the master smoking with bles furiously. desiring places of this kind can get ON THE VERGE OF SUCCESS full information about them free by writing to the Columbian Correspond-ence College, Washington, D. C. and asking for its Civil Service Catalogue, number three.

The heroic act of Messrs. Wilson of Fullers' works and Devlin of the pottery in saving the lives of a couple of the members was about. He hunters whose boat was upturned by the sudden wind which sprung up on Wednesday of last week is deserving of the highest praise. Messrs. Wilson and Devlin went to the rescue of the two hunters in a very frail boat which Wise-men only dared to enter with their mouthings. The hunters, when rescued, were nearly dead from the severe exposure that they had been sub-

jected to for several hours. The act of rescue is especially note-worthy from the fact that while a few score men stood on Fuller's wharves blowing hot advisory air, some telling what they would do if they had the right kind of boats, etc., to do it with, others telling what they had done at other times under similar circumstances; Mesers. Wilson and Devlin didn't tellesses. didn't talk in the future, perfect or past tense, but acted in the present. Jack McDonald, whose place in the rescue boat Mr. Devlin insisted on tak-Manuel Empena has purchased from ing, did splendid work helping the Land and Improvement company rescued and rescuers to land. Rope Neuman and our convivial and congenial friend Henry Fat, dressed in a very becoming sou'wester uniform, were also in manly evidence. The men, upon landing, were greeted with cheers by those on the wharves and were warmed up in the fireroom of the paint works, with something taken or the engineer's lunch box, the writer is not sure which.

#### SCHOOL NOTES,

The fall term of San Bruno school is drawing near the end, and the attendance has been larger than ever before. Next Friday is the last day, and a musical and literary program will be given in the schoolhouse at 1:30 a.m. Parents and friends of the children are cordially invited to be present.

The Easy Steward and the Auda-

cious "Grafter." A man walked into one of the uptown college clubs one morning and sat down in the smoking room. His air of assurance was hardly in accord with none of the members was about. He rang the bell, and the steward responded.

"It seems good to get back into the club again," he remarked.

"Yes, sir," said the steward. "I used to be a member here, but I've

had hard luck and can't afford it any longer.'

steward. "By the way, I'm a little short of car fare this morning," said the nervy stranger. "Could you let me have ten

"Yes, sir; I'm sorry, sir," said the

cents until I call here again?" The surprised steward reached into

his pocket and handed out a dime. "Thank you," said the man. "Now, I'm also a little hungry, having had no breakfast. Do you suppose you could gather me up a little luncheon?"

The steward was stupefied by such a display of nerve. "And a little whisky with a dash of

bitters would not go badly with the food. The steward fled as one of the members entered. The stranger saw the new arrival and rose hastily.

"I am too early for my friend;" he said as he walked toward the door. "I will return later." Then he added in an undertone, which the doorboy heard: "Too bad, too bad! That stew- \$1.20. ard was easy. He'd given me the club if I'd asked for it. It's a wonder those members wouldn't stay away." The man of nerve walked down the street with his head bowed in deep thought. How to get that luncheon without paying for it" was his theme .- New York Tribune.

#### To Dwarf Trees.

To dwarf trees as the Chinese do you must follow their methods. They take a young plant, say a seedling or a cutting of cedar when two or three inches high, cut off its taproot as soon as it has enough other rootlets to live upon and replant it in a shallow pot or pan, allowing the end of the taproot to rest There was a blaze in J. Jorgenson's Arrival house on Thursday of last week. The fire was discovered before it had gained much headway and quickly extinguished. The loss, which was slight, is covered by insurance.

CHAPTER XV .- (Continued.) having gone to Messrs, Scott and Brown. fession. "Olivia," I said, "there is a woman in Guernsey who has some clue to you--" But I could say no more, for I thought one. she would have fallen to the ground in her terror. I drew her hand through my

arm and hastened to reassure her. "No harm can come to you," I continued, "whilst Tardif and I are here to protect you. Do not frighten yourself; we will defend you from every danger."

pleasant familiarity of my name spoken ready. by her gave me a sharp pang, almost of gladness-"no one can help me or defend me. The law would compel me to be broken without the law being broken. I could prove nothing that would give

was shivering in her cold, wet dress, and trembling with fear. It was plain to me let her suffer if I could help it. When her for a moment to speak only a few

"Go in," I said, "and change every one of your wet clothes. I will see you again, once again, when we can talk with one another calmly. God bless and take care

of you, my darling!" She smiled faintly, and laid her hand

"You forgive me?" she said.

"Forgive you!" I repeated, kissing the small brown hand lingeringly; "I have nothing to forgive."

She went on across the little fold. turf, with my face to the ground, to hide my eyes from the staring light of the summer sun.

.Married? That was what she had said. It shut out all hope for the future. She must have been a mere child four years ago; she looked very young and girlish still. And her husband treated her illmy Olivia, for whom I had given up all dare to answer her, so I said: 'I beg I had to give. She said the law would compel her to return to him, and I could do nothing. I could not interfere even save her from a life which was worse to her than death.

My heart was caught in a vice, and there was no escape from the torture of its relentless grip. Whichever way looked there was sorrow and despair. never felt before, that Olivia and I had

"Martin!" said a clear, low, tender had misunderstood her. She had drop- tone in my ear, which could never be deaf to that voice. I looked up at Olivia without moving. My head was at her feet, and I laid my hand upon the hem of her dress.

"Martin," she said again, "see, I have brought you Tardif's coat in place of your own. You must not lie here in this way. Captain Carey's yacht is waiting for you below."

I staggered giddily when I stood on my feet, and only Olivia's look of pain steadled me. She had been weeping bitterly I could not trust myself to look in her face again. Tardif was standing behind her, regarding us both with great concern.

"Doctor," he said, "when I came in from my lobster-pots, the captain sent a message by me to say the sun would be gone down before you reach Guernsey. He has come round to the Havre Gosse

lin. I'll walk down the cliff with you.' "Take care of mam'zelle," I said, when we had reached the top of the ladder, and the little boat from the yacht was dancing at the foot of it. "There is some danger ahead, and you can protect her better than I."

"Yes, yes," he replied; "you may trust her with me. But God knows I should have been glad if it had gone well with

CHAPTER XVI.

My mother passed a restless and agi-Landlady-I believe in letting coffee tated night, and I, who sat up with her, was compelled to listen to all her lamentations. But towards the morning she fell into a heavy sleep, likely to last perfect security; and at an early hour I went down to Julia's house, strung up to bear the worst, and intending to have it all out with her, and put her on her guard before she paid her daily visit to our house. She must have some hours for her excitement and rejoicing to bubble over, before she came to talk about

it to my mother. "I wish to see Miss Dobree," I said to the girl who quickly answered my noisy

peal of the house bell. "Please, sir," was her reply, "she and Miss Daltrey are gone to Sark with Cap-

tain Carey. "Gone to Sark!" I repeated in utter amazement. "Yes, Dr. Martin. They started quite

early because of the tide, and Captain Carey's man brought the carriage to take them to St. Sampson's. I don't look for them back before evening."

"When did they make up their minds to go to Sark?" I inquired anxiously. 'Only late last night, sir," she answer-

Why were Julia and Kate Daltrey gone to Sark? What could they have to do with Olivia? It made me almost wild with anger to think of them finding of since." Olivia, and talking to her perhaps of me and my love questioning her, arguing with her, tormenting her! The base thought of those two badgering my Oiivia was enough to drive me frantic. In the sool twilight, Julia and Kate

Daltrey were announced. I was about That brought to my mind what I had to withdraw from my mother's room, in almost forgotten-the woman whom my conformity with the etiquette established imprudent curiosity had brought into amongst us, when Julia recalled me in pursuit of her. I felt ready to curse my a gentler voice than she had used tofolly aloud, as I did in my heart, for wards me since the day of my fatal con-

"Stay, Martin," she said; "what we have to tell concerns you more than any

I sat down again by my mather's sofa, and she took my hand between both her own, fondling it in the dusk. "It is about Olivia," I said in as cool

a tone as I could command. "Yes," answered Julia; "we have seen her, and we have found out why she "Martin," she whispered-and the has refused you. She is married al-"She told me so yesterday," I replied.

"Told you so yesterday!" repeated Julia in an accent of chagrin. "If we had go back to him. A woman's heart may only known that we might have saved ourselves the passage across to Sark." "My dear Julia," exclaimed my mother,

me a right to be free-nothing. So I feverishly, "do tell us all about it, and

was lazy or unoccupied it was pleasant to listen. My mother enjoled, with all cunning, and knows very well what he that even her fine health should not be the delight of a woman, the small touches system, and enables a woman to pass triffed with, and I loved her too tenderly, by which Julia embellished her sketches. I resigned myself to hearing a long historia woman as her companion. He we reached the foldyard gate, I stopped two questions and have done with the

leaving her in the charge of her stepmother, Richard Foster's aunt. match was one of the stepmother's making, for Olivia was little better than a child. Richard was glad enough to get her income. One-third of it was settled upon her absolutely. Richard was looking forward eagerly to her being one-andtwenty, for he had made ducks and drakes of his own property, and tried to do the same with mine. He would have done so with his wife's; but a few weeks before Olivia's twenty-first birthday she disappeared mysteriously. There her fortune lies, and Richard has no more power than I have to touch it. He cannot even claim the money lying in the Bank of Australia, which has been remitted by her trustees; nor can Olivia claim it without making herself known to him. It is accumulating there, while both of them are on the verge of pov-

onist, and he died when she was fifteen,

"Cruel!" repeated Kate Daltrey. "Well, there are many kinds of cruelty. I do not suppose Richard would ever transgress the limits of the law. But Olivia was one of those girls who can suffer great torture-mental torture I mean. Even I could not live in the same house with Richard, and she was a dreamy, sensitive, romantic child, with as much knowledge of the world as a baby. was astonished to hear she had had daring enough to leave him."

"But there must be some protection for her from the law," I said, thinking of the bold, coarse woman, no doubt his associate, who was in pursuit of Olivia. "She might sue for a judicial separation, at

Hall's Pamily Pills are the best.

REAL QUEEN OF THE CULT IS AN ITALIAN.

Beauty and Strange Influence of Teresa Brugueli, the Friend of Bresci and Malatesta - Probably an Instigator of Mckinley's Murder.

Small doubt exists among those who have followed the progress of the amarchist movement during recent years. says the London Express, that one of the instigators of the assassination of Mr. McKinley was Teresa Brugaoli-better known, perhaps, as La Bella Teresa, friend and comrade of Bresci and Malatesta, and a woman of singular beauty and magnetic influences, who for a period of eight years has made London her home. It will be remembered that last year, when the awful murder of the Italian king startled the world, the man sought by pressmen of London and New York was an individual known in the "brotherhood" as "Count" Enrico Malatesta, the leader of the Italian anarchists.

He was reported to have been in America when the plot to murder King Humbert was hatched, and to have been actually in touch with Sassi, the feather worker; Quintavalle, the barber; and Lana, the navvy-three of the secret agents who came to Europe from New York with La Belle Teresa and Bresci, the murderer of the Italian king on May 18 last year. Bresci and La Bella Teresa were the only two acquainted with the foul scheme which was intended to shake the dynasties of Europe by a succession of murders of kings and statesmen. When the Gascogne reached Europe La Bella Teresa and Bresci went to Paris, and to disarm suspicion lived in the same hotel, the other three conspirators-Sassi, Quintavalle and Lana-took up their abode in the workmen's quarter of the city.

Unlike Emma Goldman, who is a mere creature of hysteria, La Bella Teresa has no love for theatrical display, and only on rare occasions takes | side Intramuros were ladrones. to the platform. In her early childhood her father kept the post house at Molaret, and when she left her mountain home above the valley of the Dora she took up her abode with her maternal uncle, Ighina Turin, Ighina was the moving spirit of the Malfattori and a despérate anarchist. He was banished and came to London, bringing Teresa with him in 1892. Here she first met Malatesta, who used her as his recruiting sergeant. Her influence was too magnetic for weak men to resist. The murderer Bresci first met her in America in December, 1899. He was married and shown no worse taste till La Bella Teresa dame into his life than to wear a red tie and distribute anarchistic tracts. She arranged the details of the plot to murder the unfortunate king, and commissioned Bresci to carry it out; while Lana was sent to Ivrea to murder Queen Margherita. When Bresci went on his diabolical mission La Bella Teresa journeyed to London and waited for news

For centuries the ladrones have been a recognized organization. The comas freely as the American citizen pays his taxes. At times the Spaniards would make a weak effort to clean out certain sections, but in no instance did they succeed. Often the ladrone chief and the Spanish official in charge of a district had an understanding and divided the proceeds. Where an honest official made a conscientious attempt to clean the bands up he found the people too greatly intimidated to secure any aid from them and received little encouragement from his superiors. Thus the real rulers of the people out-

#### HOW WE USE THE EYES.

Absence of All Motion a Characteristic While Reading.

By close study of familiar things surprising facts about them often come to light. Professor Dodge, of Weslevan University, by a number of careful experiments, has made a strange discovery. He declares that to see, the eye must be motionless. Now that he has told us, it is easy to understand that this must be true. You cannot take pictures with a moving camera, with selfrenewing plates. The eye must stop motion while it takes a picture.

In reading, therefore, the eye does not move along the lines regularly. It takes an impresson, moves to a new position, takes another still view, then moves again. Thus the words are taken by groups. Perhaps, following Professor Dodge's lead, some other clever experimenter will now tell us just how wide the lines of print should be for In 1895 Teresa Ighina—her real name is Brugnoli; she had adopted her uncle's surname—went to Florence as a When the proper medium is found, the

A story about the late James G. Batterson, president of the Travelers' Insurance company of Hartford. Ex-Governor Walier of Connecticut wanted to obtain a charter for a new corporation which he represented, and the opposiwitness. He was asked by his own side only two questions.

"You have lived in Hartford a great many years, Mr. Batterson?" "Yes, sir."

charter?"

Here his lawyers rested, leaving the rest to chance, knowing that Mr. Batterson could keep his end up in any verbal battle with ex-Governor Waller. The latter began by asking:

many years?"

## BAD BLOOD. BAD COMPLEXION.

The skin is the seat of an almost endless variety of diseases. They are known tion called Mr. Batterson as their star by various names, but are all due to the same cause, acid and other poisons in the blood that irritate and interfere with

the proper action of the skin.

To have a smooth, soft skin, free from all eruptions, the blood must be kept pure and healthy. The many preparations of arsenic and potash and the large number of face powders and lotions generally used in this class of diseases cover up for a short time, but cannot remove per manently the ugly blotches and the red, disfiguring pimples.

Eternal vigilance is the price of a beautiful complexion

when such remedies are relied on. when such remedies are relied on.

Mr. H. T. Shobe, 2704 Lucas Avenue, St. Louis,
Mo., says: "My daughter was afflicted for years
with a disfiguring cruption on her face, which
resisted all treatment. She was taken to two
celebrated health springs, but received no benefit. Many medicines were prescribed, but without result, until we decided to try S. S. S., and by
the time the first bottle was finished the cruption
began to disappear. A dozen bottles cured her
completely and left her skin perfectly smooth.
She is now seventeen years old, and not a sign of
the embarrassing disease has ever returned."
S. S. S. is a positive, unfailing cure for

## DEATH

begins in the bowels. It's the unclean places that breed infectious epidemics, and it's the unclean body-unclean inside—that "catches" the disease. A person whose stomach and bowels are kept clean and whose liver is lively, and blood pure, is safe against yellow fever, or any other of the dreadful diseases that desolate our beautiful land. Some of the cleanest people outside are filthiest inside, and they are the ones who not only "catch" the infections, but endanger the lives

of all their friends and relatives. There's only one certain way of keeping clean inside so as to prevent disease and that is to take CASCARETS. Perfect disinfectant and bowel strengtheners. All diseases are

all bowel troubles, appendicitis, billousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, and dizziness. When your bowels don't move regularly you are getting sick. Constipation kills more people than all other diseases together. It is a starter for the chronic allments and long years of suffering that come afterwards. No matter what alls you, start taking CASCARETS to-day, for you will never get well and be well all the time until you put your bowels right. Take our advice; start with CASCARETS to-day, under an absolute guarantee to cure or money refunded.

# MANUFACTURERS

Who desire a location combining every feature conducive to prosperity, sufficiently near to San Francisco to enjoy all the privileges of a site in the metropolis, and

yet sufficiently remote to escape the heavy taxation and other burdens incident to the city. Where a ship canal enables vessels to discharge their cargoes on the various wharves already completed for their accommodation.

Where large ferry boats enter the large ferry slip now in use, and land passengers, freight and whole trains of cars.

Where a private water-works plant, with water mains extending throughout the entire manufacturing district, supplies an abundance of pure artesian water at

rates far below city prices. Where some of the largest industries in the State are today located and in full operation.

Where hundreds of thousands of dollars have already been spent in perfecting the locality for manufacturing purposes. Where the South San Francisco Land and Improvement Company own THIRTY-FOUR HUNDRED acres of land and Seven Miles of

Water Front on the San Francisco Bay, and on the main line of the Southern Pacific Railroad. Where, in fact, rail, wharf and other privileges are unexcelled for manufacturing purposes by any other locality on the coast.

If you desire such a location come and see what we have in South San Francisco, San Mateo County. For further information call or address

SOUTH SAN FRANCISCO LAND & IMPROVEMENT CO. 202 SANSOME ST., SAN FRANCISCO, CAL

# TO HOME-SEEKERS

The South San Francisco Land and Improvement Company, comprising many San Francisco, Chicago and New York capitalists, created in San Mateo county a new town site known as South San Francisco. This town site is situated on the main line of the Southern Pacific Railroad, and also on the Southern Pacific Bay

Shore Railroad, soon to be finished; it is also at the terminus of the San Francisco and San Mateo Electric Railway. South San Francisco was platted as a town just prior to the great financial panic of 1893 and 1894; during all that period of financial wreck and ruin, when almost every new enterprise and many old-established institutions were actually swept out of existence, she has held her own and is to-day a prosperous community

with a population of nearly FIFTEEN HUNDRED PEOPLE. An extensive and fine residence district, where workingmen may secure land at reasonable prices, and on favorable terms, as homes for themselves

Upwards of \$2,000,000 in cash have been expended in laying the foundation of this new town. Most of the streets have been graded, curbed and sewered, miles of concrete sidewalk laid, trees planted along the main highways, and a water-works plant completed, giving an abundant supply of pure artesian water for every purpose. But the foundation laid in what is known as the manufacturing district of this town site constitutes above all others the most positive guarantee for

There is no stability nor permanency so absolute respecting real estate values, and the future growth of any community like that which is based upon industries giving employment to men. The facilities created by the founders of South San Francisco have already secured to her several large manufacturing enterprises, and

will soon secure many more; this means not only an increase in population, but an enhancement in real estate values.

South San Francisco has passed the experimental stage, and is now an established town. Many of her lot owners who have properly improved their holdings are even to-day realizing from ten to twenty per cent net on their investments. How many communities as new as South San Francisco can make this boast? An independent community in itself, with its own supporting elements, and at the same time close to the metropolis of California, and in the direction in which San Francisco must necessarily grow, already reached by some of the city's street car service, and certain to be on the line of any new railroad entering San Francisco, South San Francisco presents to-day opportunities for investment among the safest and best on the Pacific Coast. Detail information cheerfully furnished. Address
